

new-build project

**High school canteen and
student supervision during
free midday periods,
Rheinbach**

the project

The city of Rheinbach would like to set up a childcare facility on the grounds of the municipal high school. So far, the school only has a cafeteria with break sales.

our work

The new one-storey building joins as a free-standing building on the eastern property boundary.

A canteen with 84 seats and a common room with 56 seats will be created. Both areas are arranged side by side and connected to each other by a door. The adjoining rooms connect directly to the dining and lounge.

Various childcare options take place in the common room during school hours. In addition to the improved catering for the pupils, the cafeteria also offers space for school activities such as theater performances etc. The number of participants is limited to less than 200 people.
